AGENTIC PENTESTING

Autonomous pentesting.

Senior oversight.

AI agents investigate within your agreed scope. A senior pentester oversees the work and reviews the evidence before you receive your report.

Clear scope

Also available: senior-led manual pentesting and combined engagements.

FROM FINDING TO FIX

Know what was tested.
See what the evidence shows.

01 Agree the scope

Targets, roles, access, testing window, permitted actions and price.

02 Agents investigate

Agents follow observations within the agreed boundaries and collect evidence.

03 A pentester reviews

Your pentester checks the findings and impact, and steps in where needed.

04 Receive your report

Discuss the findings, remediation priorities and which fixes to verify.

THE SYSTEM. AND EVERYTHING AROUND IT.

Web applications & APIs

Sign-in, permissions, tenant isolation and business workflows.

Infrastructure & cloud

External exposure, internal access paths, AWS and Azure.

Source code

Security decisions in code handling identities and sensitive actions.

Every report includes scope and limitations, an executive summary, prioritised findings, technical evidence and remediation guidance.

CONFIGURE YOUR SCOPE. SEE THE PRICE.

One assessment.

Published starting prices in GBP, EUR and USD.

Service / scope	GBP	EUR	USD
Web application / Small 50 dynamic pages · 50 API operations · 2 roles	£3,500	€4,250	$4,750
Web application / Standard 150 dynamic pages · 150 API operations · 4 roles	£6,500	€7,750	$8,750
Standalone API / Small 50 API operations · 2 roles	£1,750	€2,125	$2,375
Standalone API / Standard 150 API operations · 4 roles	£3,250	€3,875	$4,375
External infrastructure Up to 25 public hosts	£595	€725	$795
Cloud configuration review Agreed AWS or Azure scope	from £3,500	from €4,250	from $4,750
Active cloud testing Agreed environment, access and actions	from £6,500	from €7,750	from $8,750

Scope bands are maximums for one application. An API operation is one HTTP method on a route template: reading and updating a record count separately.

Growing scope?

External hosts above 25: +£25 / €30 / $35 each, up to 1,000 hosts. Larger networks, complex applications, internal infrastructure, source code and combined cloud scopes receive a tailored quote.

Initial setup is additional and confirmed in the quote. Scope, dates and final price are confirmed before booking. Prices checked 23 November 2026; the live calculator holds the current offer.

TEST AGAIN AS YOUR PRODUCT CHANGES

Choose your cadence.

Both plans are billed monthly under a 12-month agreement.

Quarterly testing / 4 assessments per year

Service / scope	GBP / month	EUR / month	USD / month
Web / Small	£995 £11,940 / year	€1,195 €14,340 / year	$1,345 $16,140 / year
Web / Standard	£1,845 £22,140 / year	€2,195 €26,340 / year	$2,495 $29,940 / year
API / Small	£497.50 £5,970 / year	€597.50 €7,170 / year	$672.50 $8,070 / year
API / Standard	£922.50 £11,070 / year	€1,097.50 €13,170 / year	$1,247.50 $14,970 / year

Monthly testing / 12 assessments per year

Service / scope	GBP / month	EUR / month	USD / month
Web / Small	£2,495 £29,940 / year	€2,995 €35,940 / year	$3,395 $40,740 / year
Web / Standard	£4,645 £55,740 / year	€5,545 €66,540 / year	$6,245 $74,940 / year
API / Small	£1,247.50 £14,970 / year	€1,497.50 €17,970 / year	$1,697.50 $20,370 / year
API / Standard	£2,322.50 £27,870 / year	€2,772.50 €33,270 / year	$3,122.50 $37,470 / year

External infrastructure / three-test bundle

£1,600 · €1,950 · $2,150

Up to 25 of the same public hosts. Three assessments within 12 months, paid upfront. Larger scopes and recurring cloud or infrastructure pricing are available in the calculator.

Setup is additional. Retesting terms are agreed in the proposal. Prices checked 23 November 2026.

TWO WAYS TO TEST. ONE AGREED SCOPE.

The right depth.
The right frequency.

AZACUS.IO

Manual pentesting

Work directly with a pentester on complex permissions, unusual business rules and workflows that need substantial hands-on investigation.

Tailored scope. Fixed-fee proposal.

REACTOR

AGENTIC PENTESTING

Autonomous investigation with pentester oversight and a reviewed report. Configure the scope and choose one-off or repeat testing.

Published scope-based pricing.

Combine them: repeat the agreed scope with Reactor, and add manual investigation for a new or particularly complex workflow.

See the evidence before you decide.

Explore the general sample report or request a walkthrough with a pentester. The sample uses fictional systems and illustrative findings.
